

Our objectives

Delivering effective and innovative healthcare services

- Effective financial planning that supports balanced budgets and sustainable services.
- Improved equipment and facilities through effective capital planning.
- Digital- first efficient and effective services.
- Optimising the value of our services through service-led improvement.

Improving the care experience

- Patients at the heart of safe and high quality care.
- Pathway transformation through research and innovation.
- Safe and accessible care in an environment meeting the needs of patients and staff.
- Patients and public involved in the design and improvement of services.

Creating an inclusive and kind workplace that promotes health and wellbeing

- Diverse, inclusive and kind culture with person-centred experiences for the wellbeing of our people.
- Collaborative workforce planning for the workforce of the future.
- Culture of continuous development, where we own our own learning.
- Strong partnerships with our volunteers, networks and strategic partners.

Improving our nation's health

- Support the nation's need for NHS reform.
- Deliver services collaboratively across the Scottish health and care system to support optimum healthcare services.
- Provide high quality regional and national specialist diagnostic and surgical/interventional care.
- To support innovation and transformation in surgical and diagnostic care/healthcare.
